Activity 2

```c
#include <stdio.h>

int main() {
   float average;

   printf("Enter the student's average score: ");
   scanf("%f", &average);

   if (average >= 90) {
      printf("Grade: A\n");
   }
   else if (average >= 70 && average < 90) {
      printf("Grade: B\n");
   }
   else if (average >= 50 && average < 70) {
      printf("Grade: C\n");
   }
   else if (average < 50) {
      printf("Grade: F\n");
   }
   else {
      printf("Invalid input.\n");
   }

   return 0;
}
```

```c
#include <stdio.h>

int main() {
    float average;

    printf("Enter the student's average score: ");
    scanf("%f", &average);

    if (average >= 90) {
        printf("Grade: A\n");
    }
    else if (average >= 70 && average < 90) {
        printf("Grade: B\n");
    }
    else if (average >= 50 && average < 70) {
        printf("Grade: C\n");
    }
    else if (average < 50) {
        printf("Grade: F\n");
    }
    else {
        printf("Invalid input.\n");
    }

    return 0;
}
```

```
Enter the student's average score: 80
Grade: B
```
